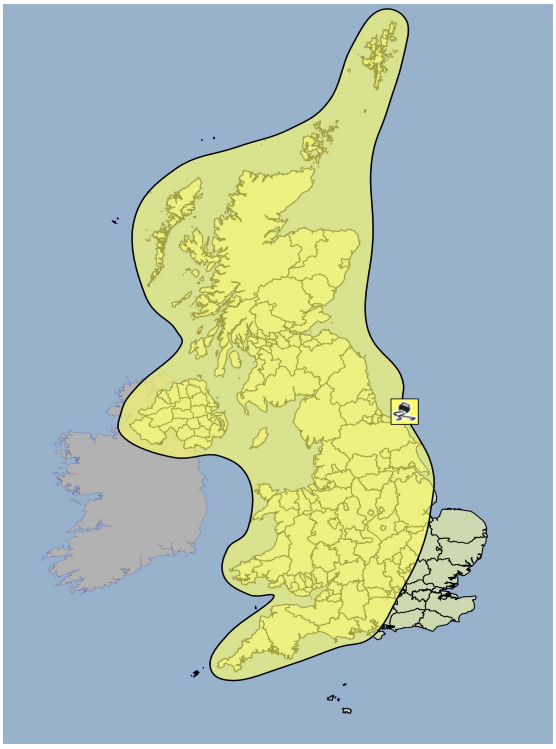
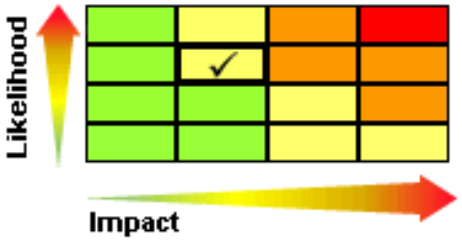
National Severe Weather Warning Service





Chief Forecasters Assessment
Following rain or showers on Monday, clearing skies will allow road temperatures to fall below freezing quite widely on Monday evening and night, leading to icy stretches on untreated surfaces which will last well into Tuesday morning. In addition, further showers may affect parts of Scotland, northern England and North Wales overnight which may lead to wash-off of earlier road treatment, enhancing the risk of ice formation. These showers could also give some accumulations of snow on routes above about 300m.

There is some uncertainty over the timing of clearance of cloud and rain towards the southeastern boundary of the yellow area, and hence also the risk of ice, so this warning may be adjusted later Monday or overnight.

The Met Office have issued a **Yellow Warning** of **Ice**

Valid from **17:00 on Mon, 13th Jan 2014** until **10:00 on Tue, 14th Jan 2014**

A combination of clear spells and light winds will allow road temperatures to fall below freezing on Monday evening across northwestern parts of the UK, and then overnight and into Tuesday morning further south and east. This will allow icy stretches to form on untreated surfaces. The public are advised to take extra care and be aware of the risk of some minor travel disruption.
